

Art Unit: 1764

Detailed Action

Allowable Subject Matter

1. The following is an examiner's statement of reasons for allowance: the closest prior art, US 6,808,689 to Matsumoto et al teaches tube and shell reactor as claimed but employs a heat transfer material wholly as a liquid phase. It would not have been obvious to one of ordinary skill to have modified the tube and shell reactor in such a way that the heat transfer material is a liquid phase and vapor phase. It would additionally, not have been obvious to have employed heat pipes as claimed with Matsumoto et al's reactor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
